

HIGH SPEED FIBER PATCH CORD

MTP/MPO Fiber Cable as an important part of the multi-fiber connection system, are designed for the reliable and quick operations in Data Centers. The obvious benefits of these cables are less space requirements and improved scalability, providing significant space and cost savings. The **MTP/MPO cables, MPO LC cable, MTP LC cable** are generally used for 40GbE and 100GbE network environment, and play a significant part of structured cabling. **Fiber-MART** offer a wide range of MTP/MPO cable assemblies including **MTP MPO Trunk Cable, MTP MPO Breakout LC Cable & Cassettes (or Patch Panels)**. All the assemblies are fully compliant with **IEC Standards 61754-7 and TIA 604-5**. We also provide **Customized Service** such as optional fiber counts, cable types and lengths etc.
